Search for profiles

Search for profiles of private and public companies, investment funds, investment fund groups, and other parties filing in SEDAR+.

For a list of descriptions of profile types, view Glossary.

Note that if your search results display a company and a third party filer profile for the same party, the company profile is the official profile of the party.

The third party filer profile was created in SEDAR for the purposes of filing a third party filing against another party.

The user must enter an accent in the search criteria to retrieve search results with an accent (eg: a search using Confédération will retrieve a company with the name Confédération but will not retrieve the name Confederation).

Click on 'Search' to see the list of matching profiles.
